MA0735 Methacryl-POSS®: Anti-Reflective Coating

MA0735 based anti-reflective coatings are robust and high performance. They exhibit strong potential for commercial applications in photovoltaics and various optoelectronic equipment, which are routinely exposed to adverse outdoor conditions. When applied to glass substrates, MA0735 anti-reflective coatings have the following effects:

- broadband anti-reflection property; excellent quasi-omnidirectional transmittance from (~50°) to (+50°) of angles of incidence; increased transmittance of double-sided anti-reflective coating glass (SEE TABLE 1)
- superior resistance to moisture, heat, salinity and exposure to acid (SEE GRAPH 1)
- better adhesion to glass substrates and impressive scratch resistance

PHYSICAL PROPERTIES

Molecular/Chemical Formula: \((C_2H_5O_{1.5})_n(SiO_{1.5})_n\)
Formula Weight: 1433.97
Appearance: clear, pale yellow
viscous liquid
Density: 1.20 g/mL
Refractive index: 1.46
Viscosity (@ 25°C): 18 poise
Thermal Stability (5% weight loss): 386°C
Solvent Solubility: THF, chloroform, acetone
ethanol, acetonitrile
Solvent Insolubility: water, hexane
Resin Solubility: aromatic and aliphatic resins

AVAILABILITY

MA0735 is available in R&D and bulk quantities. Contact info@hybridplastics.com for a quote.
